GitHub: athallaarl66 | Portfolio: <https://athalla-works.vercel.app/>

LinkedIn: <https://www.linkedin.com/in/athalla-arli-baa7b72b7>

Software Engineer with experience in fullstack development. Experienced in building and integrating backend APIs for CMS and POS systems, as well as supporting mobile application integration. Focused on writing well-documented code and improving development workflow efficiency through automation, with a strong interest in deepening expertise in backend development and system design.

Education

Telkom University – Bandung

Sept 2021 – Aug 2025

- Bachelor of Informatics | GPA: 3.20/4.00
- Undergraduate Thesis: UI Design of a Web-Based Application for Learning Sundanese Script at SMAN 24 Bandung using the User-Centered Design Method

Projects

Undergraduate Thesis – Telkom University

Jan 2025 – Aug 2025

Title: UI Design of a Web-Based Application for Learning Sundanese Script at SMAN 24 Bandung using the User-Centered Design Method

- Identified learning challenges faced by high school students as the foundation for the design process.
- Designed and developed a web-based learning application using *User-Centered Design* (UCD).
- Focused on improving *usability* and accessibility of the learning experience for the target users.

Service Management & POS Web Application – Bandung

Dec 2025 – Feb 2026

- Built a fullstack system to manage orders, customers, and transactions for a small-scale shoe cleaning business.
- Designed PostgreSQL database schema and multi-step workflow logic.
- Built a REST API with authentication and an admin dashboard.

Financial Management System (Money Tracker) – Bandung

Jan 2026 – Mar 2026

- Developed a fullstack app for managing accounts, transactions, and budgets.
- Implemented JWT authentication and recurring transaction features.
- Built analytics features including category breakdowns and monthly trends.
- Experimented with Docker for backend containerization and deployed to cloud (Koyeb).

Industrial IoT Asset Monitoring Dashboard – Bandung

Apr 2026 – Jun 2026

- Backend & Architecture: Built the backend using .NET 8 with a Clean Architecture / DDD structure to keep the codebase modular.
- Data & Real-time Stream: Integrated MQTT (Mosquitto) to handle sensor telemetry data (temperature, pressure, vibration) and SignalR to push live updates to the dashboard.
- Infrastructure: Wrote edge data simulation scripts, managed data storage in PostgreSQL, and containerized the entire system using Docker Compose.

TVP-SDD-CLI (Dev CLI Tool) – Bandung

May 2026 – Jun 2026

- Built an automation *CLI tool* (status: *active beta & testing*) inspired by OpenSpec concepts to cut down *manual effort* in producing technical documentation (PRD, *Technical Design*) down to scenario level.
- Implemented automated folder structuring as a standard for supplying data context that can support workflow automation.
- Provided automatic *task breakdown* from PRD documents and a *template skill/workspace* generator ready for workflow automation.

Work Experience

Firma Hukum Rantai Khatulistiwa – Jakarta

Jul 2024 – Sept 2024

Full Stack Developer – Intern

- Developed and customized the company profile website.
- Added online legal service features.
- Designed and integrated frontend components into the website.
- Collaborated with the team to align features with business requirements.

GITS.ID – Bandung

Apr 2026 – Present

Software Engineer – EDP

- Worked in an Agile/Scrum environment using Taiga, applying Spec-Driven Development (SDD) practices across every *sprint* cycle.
- Developed a POS (*Point of Sale*) application using Laravel and Filament, including building *admin dashboard* features for account management, store allocation (*multi-store/outlet*), and access control.
- Managed a CMS system for an enterprise-scale client, including designing and building a REST API *backend* for integration with *mobile* Android and iOS applications.

Organizational Experience

External division – PERMIB – Telkom University

Sept 2023 – Jul 2024

- Built and maintained relationships between student organizations.
- Compiled meeting minutes and activity timelines for the organization.

Sponsorship Division– Perfect – Telkom University

Sept 2022 – Jul 2023

- Maintained relationships with sponsors.
- Created sponsorship pitch materials and presentations.

Skills

-
- Frontend: Next.js, React, Tailwind CSS, HTML, CSS
 - Backend: Laravel, Spring Boot, .NET 8, Node.js, REST API, JWT
 - Database: PostgreSQL, MySQL
 - Tools: Git, Prisma ORM, Docker, Vercel, Figma, MQTT, SignalR

Certifications

-
- EPRT – Telkom University Language Center
 - Problem Solving – Hacker Rank
 - Foundations of Coding Full-Stack – Professional Microsoft Full-Stack Developer (Coursera)
